

Four to be honored at Fall Design Fête

The Washington Architectural Foundation (WAF) and AIA | DC present the 6th annual Fall Design Fête on Friday November 16, 2018 at Washington National Cathedral. The Fête celebrates the contributions of individuals who make Washington better through their contributions as designers, advocates and clients. Congratulations to our honorees!

Mary Katherine Lanzillotta, FAIA is this year's Centennial Award recipient for distinguished service to the Chapter, community and profession. She has served in leadership positions on the Chapter and WAF Boards, serving as president of AIA | DC in 2000. She has served the community in many ways, but chiefly as the founder and project director of WAF's Architecture in the Schools program. She was

Mary Katherine Lanzillotta, FAIA

awarded the John Wiebenson Award for Architecture in the Public Interest in 2006 for her community service. She has served the profession as a mentor for many young architects and served on multiple juries around the country including Chair of AIA's Honor Awards jury.

Lanzillotta directed the renovation and restoration of the Donald W. Reynolds Center for American Art and Portraiture, home of Smithsonian American Art Museum and National Portrait Gallery, a National Historic Landmark and arguably one of the most important Greek Revival buildings in America. The project took more than a decade to complete and has received numerous awards. Additionally, she has worked on the restoration of the Lincoln and Jefferson Memorials, the American Pharmacists Association and The Hay-Adams Hotel, all in Washington, DC. Currently she is working on the restoration of and renovations to the House of the Temple and the National Gallery of Art.

(continued on page 2)

Four to be honored at Fall Design Fête *(continued from cover)*

Tommy Wells, director of DC's Department of Energy and Environment, is the winner of this year's Glenn Brown Award. This is an award given jointly by WAF and the Chapter and celebrates those who improve the quality of life in the District and raise awareness of architecture and its benefits to society. With a career in public service spanning three decades, Wells been a passionate advocate for sustainable green living. As a Councilmember, representing Ward 6, he garnered broad support for his efforts to make the District livable and walkable for all. As Chair of the DC Council Committee on Transportation and the Environment, he worked to double the city's Capital Bikeshare program. Among many other initiatives, Wells is responsible for The Anacostia River Clean Up and Protection Act of 2009, which implemented the \$0.05 fee on disposable, plastic bags to lessen their impact on the river. This landmark legislation prompted thousands of District residents to curb use of plastic bags and instead opt for reusable, green alternatives. Wells is a champion of DC's architecture and advocates for the city's sustainability and resiliency, the latter of which has recently been recognized when the city was named the first LEED Platinum City certified in the world.

Tommy Wells

Architect **Greg Kearley** wins this year's John 'Wieb' Wiebenson Award for Architecture in the Public Interest. Kearley is founder and managing principal of Inscape Studio and executive director of the firm's non-profit arm, Inscape Publico, which provides affordable architecture solutions to other nonprofits to help them fulfill their missions and make a positive impact on the community. Kearley

Greg Kearley

received some early training in this by volunteering for the WAF's Community Design Service after graduating from Catholic University's Masters program. In starting his firm he had a very specific goal: to do contemporary architecture that was socially responsible and environmentally sensitive. Inscape Publico was founded in 2010. Mi Casa and Arlington Food Assistance Center are two local clients but the Publico arm also does work overseas; a silk-weaving studio in India, a masterplan for a school in Nicaragua and a series of women's centers in Afghanistan are some of their recent projects. A silkweaving studio in India, a masterplan for a school in Nicaragua and a series of womens centers in Afghanistan are some of their recent projects.

Nakita Reed, AIA is this year's Emerging Architect Award winner. This award recognizes exceptional leadership early in a career. In the relatively short time since her graduation, Reed has made significant contributions to the fields of architecture, sustainability and preservation. She the co-founder and managing principal of Encore Sustainable Design which was founded based on the idea that adaptive reuse of existing and historic buildings is an inherently sustainable pursuit. She is the current chair of the Maryland Green Building Council and serves on several boards including the Alice Ferguson Foundation, Preservation Maryland and the Benjamin Banneker Development Corporation. She has been responsible for several award-winning projects including the restoration of the McCormick-Goodhart Mansion in Langley Park, MD.

Nakita Reed, AIA

Congratulations to the winners. Please join us to celebrate their achievements at Washington National Cathedral on November 16th! Please visit aiadc.com/Fete2018 to learn more.

New Fellow Ronnie McGhee, FAIA with his daughter amid the throng outside St. Patrick's Cathedral.

AIA President Carl Elefante, FAIA and Chancellor of the College of Fellows, Raymond Post, FAIA lead the new Fellows down the aisle after the Investiture at St. Patrick's Cathedral.

AIA President Carl Elefante, FAIA presents Lenore Lucey, FAIA with the Edward C. Kemper Medal. Since 1950, this award has honored members who carry on his legacy of continued and significant service to the AIA.

Larry Barr, FAIA celebrates with family after receiving his medal.

Congratulations 2018 AIA|DC Fellows!

The 2018 Jury of Fellows from the American Institute of Architects (AIA) elevated nine members of the AIA | DC Chapter to the AIA's prestigious College of Fellows. The new Fellows received their pins at a local gala dinner in April and their official national induction took place on June 22 at St. Patrick's Cathedral as part of the AIA Conference on Architecture 2018 in New York City.

The fellowship program was developed to elevate and recognize architects who have achieved a standard of excellence in the profession and who have made a significant contribution to architecture and society on a national level. The Chapter is extremely proud of the new fellows whose impressive achievements and contributions are listed below. The AIA DC Chapter also benefits from a very active Fellows committee, headed by Janet White, FAIA.

Larry R. Barr, FAIA is a national leader in the transformation of iconic American buildings. His fellowship recognizes his role in advancing the standards of architectural preservation, restoration and adaptive use of historic properties. Barr is the President of Quinn Evans Architects.

Randall J. Biallas, FAIA serves as the chief historical architect of the US National Park Service and leads the preservation of architectural and landscape heritage in America's national parks by shaping policy, setting standards for preservation practice and mentoring the next generation of architects and landscape architects.

Gerald W. Briggs, FAIA serves as the Director of the firm AECOM and fosters technical, creative, and human potential in complex federal projects. He helps make federal design stronger and more responsive by challenging preconceived formulas and expanding design boundaries that together, serve to enhance user performance.

Anna Y. Franz, FAIA, is the Chief Architect for the US Courts and serves on the AIA | DC

Board. Her fellowship recognizes her tireless championing of a whole-systems approach to preserving, using, enjoying and sustaining national landmarks and other federal facilities.

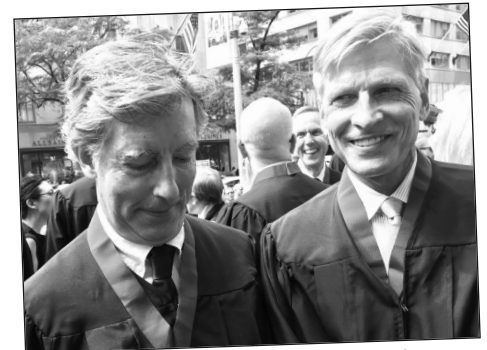

William B. Gallagher Jr., FAIA is a principal at KGP Design Studio, LLC and is recognized for his extensive work in intermodal transportation. His leadership in innovative planning, design and public engagement in this industry sector helps to ensure a sustainable future.

David J. Insinga, FAIA, Chief Architect of GSA's Public Buildings Service, champions excellence in federal design and the preservation of national historic treasures. He inspires architects and stakeholders in the design process to aim for creating public buildings and workplaces that surpass expectations and, in doing so, help to transform communities.

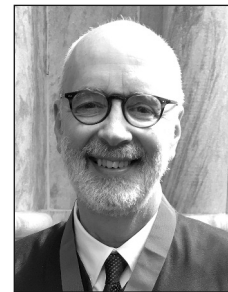

Ronnie W. McGhee, FAIA is a dedicated champion of disadvantaged neighborhoods and his work of combining design, preservation, public service and engagement furthers that goal. As part of his public service work, McGhee teaches at Howard University's School of Architecture and Planning and serves as Chairman of DC's Board of Architecture, Interior Design and Landscape Architecture.

Sean M. O'Donnell, FAIA is recognized for his vision to reestablish the urban school as the center of its community through synthesizing civic architecture, sustainable design, and innovative educational planning. He is a principal at Perkins Eastman.

Ronald J. Tomasso, FAIA raises the standard of universal accessibility and melds that with the goal of making US Embassies accessible to all staff and visitors. His strategic thinking and leadership on these important issues help to make accessibility an integral part of diplomatic outreach.

New Fellow Bill Gallagher, FAIA (left) with other Fellows from around the US on the sidewalk in front of St. Patrick's Cathedral.

New Fellow Gerald Briggs, FAIA

New Fellow Sean O'Donnell, FAIA

Stephen Ayers, FAIA won the Thomas Jefferson Award for Public Architecture which recognizes architects in the public and private sectors, public officials or other individuals who design distinguished public facilities and/or who advocate for design excellence. He is shown here with AIA President Carl Elefante, FAIA and AIA's EVP/CEO, Robert Ivy, FAIA

Design DC welcomes developer Jonathan Rose as Keynote Speaker for its 'Constructing an Equitable Future' conference

Design DC is pleased to announce that Jonathan F.P. Rose will be the keynote speaker at this year's Design DC conference, underlining the conference theme of 'Constructing an Equitable Future'. Mr. Rose is one of the nation's leading thinkers on the integration of environmental, social and economic solutions to help solve urban development issues and is recognized for both creating new and helping to heal existing communities. For this keynote address, Rose will discuss applying the transformative power of connected, integrative, well-designed and thoughtfully programmed places to restore the balance between humans and nature in order to increase well-being. In addition and on a more granular level, he will also provide positive and responsible solutions to the challenges of 21st century cities like Washington DC.

Rose is the founder of the investment, development, and urban planning firm Jonathan Rose Companies. The company believes

that every resident of every community deserves an equal opportunity to thrive and the company's projects try to carry this vision forward. Among the many projects the company has been involved in is Via Verde, which won an AIA Multifamily Housing Award in 2013.

Jonathan F.P. Rose

This year's DesignDC conference, under the rubric of 'Constructing an Equitable Future', will analyze the role of architects, interior designers, engineers, contractors, planners, landscape architects and developers in creating working, playing, and living spaces that are open, accessible and useable by all, regardless of ability, income-level or age.

BluEdge

Contact: Michael Vagnoni
Phone: 202.293.1214
Email: Michael.vagnoni@bluedge.com

BluEdge was founded in New York City in 1898 as National Blueprint Inc., and has evolved into an industry leader in print and technology services for the AEC industry in North America and Europe. BluEdge is recognized for their customer service, and expertise in 3D services, including 3D printing, scanning and rendering, virtual reality, creative large and small format graphics, managed print services, and document management solutions, including hyper-linking, archiving and scanning and workspace hub.

In cooperation with the AIA DC, BluEdge's Technology Hub interactive resource presents the latest emerging technologies and software for the AEC community and beyond. The Technology Hub also functions as a forum for the exchange of ideas, with curated lectures and workshops by BluEdge's team of subject matter specialists. For more information, please visit www.bluedge.com.

A gentle reminder to respond to our DC Permit survey

In the last issue, we introduced a new survey designed to create a data set of DCRA's timeliness (or lack of) in the permit review process. It is designed to be quick and relatively painless but it is very important that the local architecture community provides objective input on any DCRA changes; this survey is an important component of that input.

So, for those who have already responded or are in process, thank you. For those who have not yet done so, please consider taking the time to provide this information so that we can help to guide DCRA, help them to function more efficiently and lessen our need for aspirin.

Need a link? Look in your inbox or email mfitch@aiadc.com for more information.

Realize your full potential with BIM

We can help you get the ROI you want from your design processes and software, like Autodesk Revit, Navisworks and Bluebeam.

We're here to help you:

- ⊕ Make the transition to 3D and BIM, to leverage the benefits of modeling
- ⊕ Maximize the benefits of the technology you've purchased
- ⊕ Evolve workflows and processes to use your model data more efficiently
- ⊕ Streamline workflows and create design standards
- ⊕ Seamlessly update processes and roll out learning paths

Get the unrivaled expertise of CADD Microsystems on your team, and we'll bring with us our decades-long partnerships with industry leaders like Autodesk, Bluebeam and Global eTraining.

¹ In testing performed in accordance with ASTM testing standards, Pella's Duracast® fiberglass composite has displayed superior performance in strength, ability to withstand extreme heat and cold, and resistance to dents and scratches.

² U-Factor of Duracast frame is 2.4 times greater than that of thermally broken aluminum when compared in thermal testing.

B

HOK announced that **Stephen Beacham, AIA, IIDA**, has relocated to their Washington, D.C., office as principal and director of design for interiors. Beacham, who has more than three decades of experience, will partner with the D.C. office's director of interiors, Vincent Ng, AIA, LEED AP, to lead the office's client relationships and focus on design excellence.

Stephen Beacham, AIA, IIDA

D

Ann K. Dilcher, AIA, LEED AP, a principal with Quinn Evans Architects, has been named to the company's board of directors. Dilcher joined Quinn Evans Architects in 1997 and has overseen major preservation, rehabilitation and adaptive use projects throughout Michigan.

Ann K. Dilcher, AIA, LEED AP

Dilcher's portfolio features several landmark projects, including the restoration of the Bay City City Hall, the design of the new Davidson-Gearson Modern Glass Gallery within historic space at The Henry Ford Greenfield Village, and a comprehensive modernization of the circa-1906 Howell Carnegie District Library in Howell. Currently, she is directing expansion and renovation projects for the Allegan District Library in Allegan and the Glen Lake Community Library in Empire and is also overseeing the design of the new North branch of the Clinton-Macomb Public Library in Macomb Township.

F

Ferguson Bath, Kitchen & Lighting Gallery, A Corporate Affiliate Member and the largest plumbing distributor in the U.S., has opened a 7,500-square-foot boutique showroom at 5225 Wisconsin Ave. NW. Business hours are Monday through Friday, 9 a.m. to 5 p.m., and Saturday, 10 a.m. to 5 p.m. Walk-ins are welcome; however, appointments are recommended if a personalized consultation is desired. For more information, visit www.fergusonshowrooms.com or call 202-567-5656.

M

Jeffrey Morgan has joined the Baltimore office of Cho Benn Holback, a Quinn Evans Company, as an associate. An architect with more than 25 years of experience, Morgan brings a deep portfolio in complex renovation, adaptive use, and historic preservation projects to the firm. Morgan has served as project manager and construction administrator on many award-winning projects throughout the Mid-Atlantic,

Jeffrey Morgan

including college and university facilities, centers for the performing arts, visitor centers, libraries and urban revitalization initiatives.

Muse Architects promoted **Scott P. Mooney, IIDA, ASID**, to Associate in May. Scott joined Muse Architects in 2013, has been at the forefront of the firm's integration of interior design services and has also provided design and project management assistance on many commercial and residential projects. In addition, he has led the interiors efforts on many commercial projects, including the Washington DC headquarters for Academic Travel Abroad, as well as the new and ongoing planning and design efforts for a prominent national foundation.

O

Interior architecture and design firm OTJ Architects has re-imagined common areas and street-level exteriors at 1100 17th Street, a circa 1960s commercial space close to Farragut Square. The OTJ team, headed by Ania Leeson, AIA, LEED, AP, Partner & Studio Director, and Jose

1100 17th Street by OTJ

Benitez, Senior Project Architect, used targeted tenant studies and competitor analyses to develop cost-effective design strategies that optimized the building's performance while causing minimal disruption to existing tenants. The building's street-level presence was maximized with operable indoor/outdoor partitions and the addition of retail canopies and signage. The project team also partnered with noted local artist Maggie O'Neill to develop an impressionistic mural to accent the lobby's architectural features.

Dewberry, a privately held professional services firm, announced that **Jean O'Toole, AIA, PMP, LEED AP BD+C**, has been promoted to business unit manager in the firm's Fairfax, Virginia, office. In her new position, O'Toole will be responsible for managing the architecture office's daily operations and serving the firm's public and private client base.

Jean O'Toole, AIA, PMP, LEED AP BD+C

O'Toole has more than 27 years of experience as an architect and project manager. Her expertise includes design of large-scale facilities, renovations in occupied buildings and existing conditions assessments. Her project portfolio includes the Pentagon Visitor Screening Facility, Fort Bragg Conference and Catering Center, Western Loudoun County Sheriff station, Chatham County Courthouse and healthcare renovation projects for Kaiser Permanente.
